

CompassAVL™

Real-Time Location for Real-Life Impact

Real-Time Fleet Visibility for Public Works Transparency

Give citizens secure, real-time visibility into snowplows, waste collection, street maintenance, and utility operations—while your agency controls what location data is shared.

CompassCom®

CompassAVL delivers real-time GPS tracking and operational transparency for municipalities, public works departments, and utilities. It enables agencies to securely share live vehicle location data with the public—reducing service calls, improving citizen awareness, and building trust through accurate, real-time operational information.

Citizen Transparency

Share real-time fleet activity with residents during snow, waste, street, and utility operations.

Reduced Service Calls

Minimize inbound 311 and service inquiries by giving the public direct access to current fleet activity.

Live Fleet Tracking

Display active vehicle locations for snowplows, waste trucks, field crews, and public works assets.

Controlled Public Visibility

Configure delays, activity filters, geofences, and privacy settings to protect sensitive operations.

Built for Your Mission

SNOW & ICE MANAGEMENT

Show active snowplow locations and fleet progress during winter weather events.

WASTE & RECYCLING

Keep residents informed on collection activity, route progress, and service visibility.

STREET MAINTENANCE

Improve public awareness of road work, maintenance crews, and municipal service coverage.

UTILITIES & FIELD SERVICES

Provide controlled visibility into utility fleet activity while protecting sensitive locations.

Why CompassCom?

- ✓ 30+ years of GPS, GIS, and fleet operations expertise
- ✓ Built for municipalities, public works, utilities, and service fleets
- ✓ Public-facing visibility with agency-controlled privacy settings
- ✓ Esri ArcGIS integration with authoritative map and feature layers
- ✓ Configurable delay settings, activity filters, and geofence areas
- ✓ Improves safety, efficiency, and operational transparency
