

CompassTAK™

Real-Time Location for Real-Life Impact

Powered by CompassCom® for TAK Server Location Integration

Send CompassTrac® Enterprise GPS location data into TAK Server environments to improve shared situational awareness across ATAK and WinTAK users.

CompassTAK connects CompassTrac Enterprise with TAK Server environments, allowing organizations to stream GPS location data from supported radios, vehicles, broadband devices, and off-network field units into ATAK and WinTAK for a shared operational picture.

Real-Time TAK Visibility

Stream GPS location data from CompassTrac Enterprise into TAK Server so field teams and command users can view shared location awareness in ATAK and WinTAK.

Multi-Source GPS Integration

Publish location data from supported LMR radios, vehicles, broadband devices, mobile assets, and off-network field units into TAK workflows.

Secure Server Integration

Support controlled TAK Server deployments with encrypted data paths designed for on-premise, firewalled, air-gapped, and mission-critical environments.

TAK Integration for LMR Radios

Supports leading LMR radios, including Motorola Solutions APX, MOTOTRBO™, and BK Technologies® devices, and extends their location awareness into TAK workflows.

Built for Your Mission

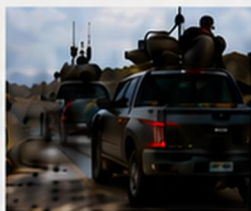

DoD OPERATIONS

Share real-time positions from CompassTrac Enterprise into TAK Server to support coordinated field operations and tactical awareness.

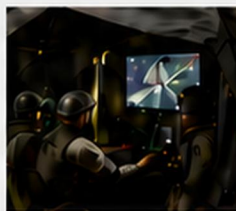

PUBLIC SAFETY RESPONSE

Improve shared visibility across law enforcement, fire, rescue, and emergency response teams using TAK-based operational workflows.

RADIO & VEHICLE TRACKING

Send GPS locations from supported radios, fleet vehicles, and mobile assets into TAK environments for broader team awareness.

INCIDENT COMMAND & FIELD OPERATIONS

Maintain visibility of teams, assets, and response activity during temporary, remote, or high-risk field operations.

Why CompassCom?

- ✓ 30+ years of GIS, GPS, and field operations expertise
- ✓ Integration with TAK Server
- ✓ Supports ATAK and WinTAK operational visibility
- ✓ Integrates radios, vehicles, broadband devices, and off-network field units
- ✓ Secure deployment options for mission-critical environments
- ✓ TAK integration expertise for mission-critical operations
