

CompassTrac® Enterprise

Real-Time Location for Real-Life Impact

Secure Real-Time Location Awareness for Disconnected Operations

Built for DoD, public safety, and federal teams that require secure, on-premise location awareness with no internet exposure.

Powered by CompassCom®

CompassTrac Enterprise provides secure, real-time location awareness for Motorola and BK Technologies radios operating in mission-critical LMR environments. Designed for disconnected, on-premise deployment, it helps command teams maintain operational visibility, coordinate field personnel, and make faster decisions without dependence on cloud-based map services or external connectivity.

Disconnected Operations

Operate inside secure customer networks with on-premise maps and no cloud dependency.

Information Assurance

Support a hardened deployment process aligned to mission-critical security expectations.

Radio Location Awareness

Track LMR radios with position, speed, heading, and radio status.

Alerts & Geofencing

Improve command visibility with emergency activation and perimeter breach notifications.

Built for Your Mission

DOD OPERATIONS

Maintain real-time mission awareness inside secure, disconnected environments.

PUBLIC SAFETY COMMAND

Coordinate responders, assets, and operational boundaries from one secure view.

FEDERAL AGENCIES

Support Motorola and BK Technologies LMR radio tracking using existing infrastructure.

SECURE INSTALLATIONS

Monitor geofences, perimeters, emergency alerts, and mission-designated areas.

Why CompassCom?

- ✓ 30+ years of GIS, GPS, radio, and fleet operations expertise
- ✓ Secure deployments for DoD, federal, and public safety teams
- ✓ Disconnected and on-premise architecture with no cloud dependency
- ✓ Information Assurance hardening for mission-critical environments
