

CompassVision™

Real-Time Location for Real-Life Impact

Powered by CompassCom® for Public Sector Fleet Intelligence

Turn your fleet into a real-time system of awareness, safety, and operational intelligence.

CompassVision combines CompassCom's GPS and fleet operations expertise with forward-facing dash camera technology to deliver real-time video, AI-driven insights, and GIS-ready intelligence for **safer roads** and **smarter operations**.

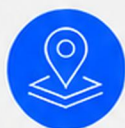

Real-Time Visibility

Live HD video and GPS location from your fleet deliver instant awareness and reliable evidence.

AI Roadway Intelligence

Detect road conditions, hazards, and infrastructure assets—supporting faster decisions and safer roads.

GIS-Ready Insights

Seamlessly integrate AI detections and video into Esri environments, alerts, dashboards, and reports.

Smarter Operations

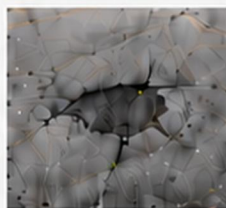

Improve safety, optimize resources, and reduce risk with data you can trust every day.

Built for Your Mission

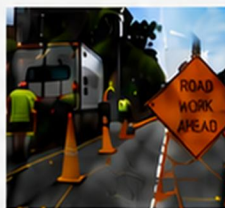

WINTER OPERATIONS

Real-time snow and road condition awareness to prioritize and respond with confidence.

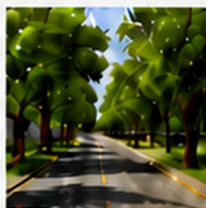

INFRASTRUCTURE INTELLIGENCE

Identify hazards, pavement issues, and asset conditions across your network.

WORK ZONE VISIBILITY

Monitor work zones and field activity to keep your team safe and the public informed.

FLEET ACCOUNTABILITY

Support driver safety, incident documentation, and claims with visual and location-based proof.

Why CompassCom?

- ✓ 30+ years of GIS, GPS, and fleet operations expertise
- ✓ Proven solutions for public agencies nationwide
- ✓ Scalable deployments from department to statewide
- ✓ Trusted partner focused on your mission and success
